

HAMILTON'S

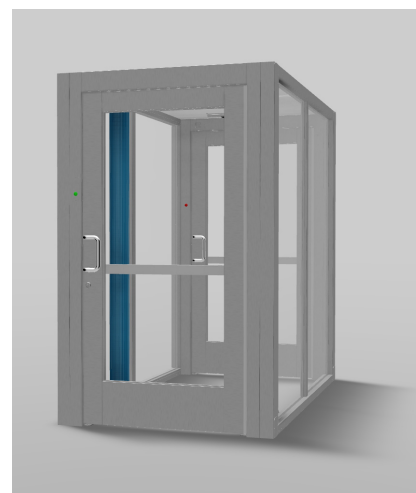

School Entrance Control Vestibule

Protecting Our Children!

Hamilton's Entrance System Vestibule provides a tough first line of defense in preventing firearms & weapons from entering your building, school or university. The unit incorporates key features such as metal detection, motion sensors and door locking controls with warning alerts to prevent unauthorized access.

Features

- Stainless steel construction
- Bullet-resistive glass
- Multi-functional operator console
- ADA Compliant and designated by the Homeland Security Act
- CEIA Walk-through Metal Detection

Benefits

- Keep Our Children Safe
- Visual deterrent
- Sense of security for the staff and students
- Increases security during school hours
- Prevents firearms & weapons from entering your building

Standard units are available, but if your building entrance needs a unique solution, let us help you design and build a custom vestibule to fit your needs!

Optional tablet available

- Wireless control for communications
- Windows based system
- Two-way audio/one-way video for attendants to see the person inside the Vestibule
