

Ultraviolet C Light Kits for Overhead HA-1000 XLR

Extreme sanitation
for safe transactions

HAMILTON
BY **GUNNEBO**®

XLR-UVC, XLR-UVCR

Ultraviolet C Light is a short-length light that can kill microorganisms.

The UVC Light Kit is retrofit for existing overhead XLRs or factory installed on new units.

Just remove the plastic unit, place kit into place, and secure.

INNOVATIVE DESIGN BENEFITS

- DISRUPTS MICROORGANISM DNA, MAKING THEM INCAPABLE OF REPRODUCTION AND HARMLESS.
- UVC LIGHT DECONTAMINATION DEVICES USE HIGH OUTPUT UVC LAMPS TO EMIT A CONSTANT DOSAGE OF UVC LIGHT.
- THE UVC LIGHT IN DECONTAMINATION DEVICES IS CREATED BY USING A GERMICIDAL LAMP, WHICH IS SIMILAR TO FLUORESCENT OVERHEAD LIGHT.

FEATURES

- KILLS BACTERIA, VIRUSES, AND OTHER PATHOGENS ON CARRIER AND INSIDE OF XLR POCKET.
- TINTED DOOR THAT CLOSSES WHEN SANITIZING, ENSURING NO ULTRAVIOLET LIGHT ESCAPES.
- 10,000 SERVICE HOURS OR 2.5 YEAR LANE OPERATION.

Night Lock Switch

Teller Unit

Pushing the Night Lock Button on the Teller Unit activates the UVC LEDs.

The blue indicator light illuminates during the sanitizing process.

An inside look at a HA1000-XLR unit with the UVC Light Kit

Manufacturers and providers of the latest in drive-up systems, modular vaults, vault doors, night depositories, physical security containers, alarm systems, safe deposit boxes and surveillance equipment.
