Safeguard Your Assets, Staff & Customers

Choose any combination of vaults, safes, drive-up and walk-up systems, and electronic security equipment

In the state-regulated cannabis industry, growers, distributors and retailers looking to run a successful business within the rules and a very cash-intensive market face a multitude of security challenges.

While the rules and regulations vary by state, most compliance standards require security equipment and systems that ensure cannabis access is regulated, product is secure, and inventory is tracked, monitored and reported in the event of a security incident.

Highly secure physical equipment and video surveillance are crucial for cannabis owners to not only comply, but to protect their business from threats such as internal theft, fire and break-ins. Working together, they provide multiple layers of security across your entire cannabis operations.

HAMILTON SECURITY SOLUTIONS TO PROTECT YOUR CANNABIS FACILITY

Hamilton Security provides a full line of vaults, vault doors, safes and locks, drive-up and walk-up systems, depositories and electronic security systems that meet and often exceed the security industry's highest anti-burglary and fire protection standards.

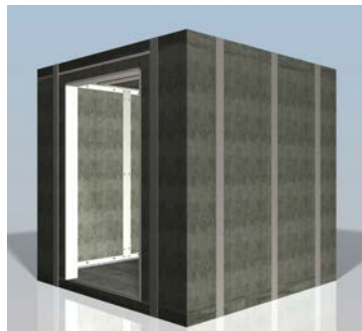

Hamilton's custom and standard security equipment, built with rugged stainless steel and the highest UL-certified ratings, assures your cannabis business maximum security and protection from fire, flood, burglary, theft and natural disasters.

These security systems, combined with electronic security solutions, provide the depth of defense you need to safeguard your assets, employees and customers, while meeting cannabis compliance standards.

VAULTS & VAULT DOORS
