

Add On Air Flow Thermostat

HAMILTON DRIVE-UP

Kit# E0873-AFT

- *Hamilton Drive-Up customer unit must have the E0873 control board and optional airflow kit installed.*
- *Kit includes an eProm chip which allows operation to be suspended until the lane is not being used regularly.*
- *With the thermostat installed, airflow operation is suspended when temperatures are above a set point.*
- *Will not run in warmer weather when tube condensation is NOT an issue. When temperature drops below a set point, airflow function restores automatically.*
