Cash Recycling
Keep your cash flowing.

Cash is like water. For it to grow it needs to keep flowing.

Cash is still the most common form of payment globally and it has to be managed properly for it to generate profit.

That's what cash flow is all about. Because cash that isn't circulating or saved in the bank, has no value. This means it cannot sit still in your store; if it does, it can overflow. Just like water. Cash needs to flow efficiently if you want to make the most out of your earnings.

By optimizing your cash flow - minimizing the amount of cash kept at the store and maximizing the amount that goes into your bank - you also optimize the pickup services, insurance, labor and security costs. In turn, this provides a safer and more productive work environment for customers and employees.

Keep your cash flowing.

Optimally,
to maximize profits.

When you automate cash processes with a cash recycling system, you also get to optimize your cash flow by rapidly transferring your earnings into the bank.

Steadily,
to have it there when you need it.

Whether it is too much cash or too little, this can cause unnecessary costs. By having the right amount of cash, at the right time, this will optimize your business.

Safely,
to avoid cash handling risks.

From the minute customers pay, cash should be kept safe, whether it's in the bank or your store. Our cash recycling units provide a highly secure cash processing system that allows notes and coins to be kept out of reach and customers and employees safe.

Efficiently,
to cut down on costs and
generate profit in less time.

Cash recycling allows you to manage all operations more efficiently, without having to spend time or money counting, sorting and storing cash manually. The sooner cash is processed, the sooner it starts generating value. This also allows staff to focus on their customers and build a customer-centric operation.

Easily,
to make sure you meet
your business needs.

Cash recycling is a highly versatile solution designed to adapt to various business environments. It offers multiple configuration settings that adapt the cash processing system to the space, capacity, workflow and needs of every business in the retail and banking industry.

Under control,
to keep track of all operations.

Cash recyclers automate processes and keep track of all transactions, allowing staff to access real-time information and control operations remotely.

Endlessly,
to ensure you get a
return on your investment.

Our cash recyclers use a mature technology that combines reliability, functionality and efficiency. Maximize your return on investment with our cash recycling solutions.

Cash recycling for banks and credit unions.

Whether it is too much cash or too little, this can cause unnecessary costs. By having the right amount of cash, at the right time, this will optimize your business.

Teller cash recycling is a highly versatile solution designed to adapt to various banking environments. Our teller cash recyclers use a validator technology that combines reliability, functionality and efficiency. Maximize your return on investment with our cash recycling solutions.

In banking it's all about security and the customer experience. Cash recycling automates cash authentication and improves accuracy, productivity and

accountability for every cash transaction. This allows for operational transformations within the branch and tellers to take on more dynamic, customer-centric roles.

Beyond security, the cash recycler has optimal capacity to meet your individual needs and requirements. Utmost reliability is achieved through a state-of-the-art note sensor, combined with advanced note recycling technology which translates into maximum uptime.

Seamless software integrations with your existing teller systems and fast, easy installation minimize disruption to your banking activities.

Cash recycling for retail.

Nowadays new payment methods are changing the way customers pay, but cash still remains the most common form of payment. Cash provides for fast and instant payment. Cash is anonymous, indiscriminative, and is accepted worldwide. Even in countries where cash payments are on the decline, the costs associated with cash management have increased and retailers are under increased pressure to process large volumes of notes and coins daily.

Cash is constantly circulating, and it needs to be managed effectively and efficiently. Cash recycling optimizes the cash management process by providing an automatic and highly secure system that sorts and counts money with accuracy, eliminating miscounts, paperwork and cash shortage. Staff spend less time on reconciliation and more time with their customers.

Cash recycling reduces the total amount of cash sitting in the store, optimizing the cash flow by rapidly transferring earnings into the bank. Operations can be controlled easily using the custom application software.

In addition, CashControl, our integrated online management tool provides access to real-time information and remote monitoring, allowing you to take control without having to be physically present.

Flexible note recycling.

Whether you're a small or mid-size retail business owner or a corporation with multiple retail stores, the R7 might be just what you need if you want a note-only recycling unit to use in store, off-site or in drive-up. Our flexible recycling solution offers all the benefits of cash recycling in one single compact unit, optimizing your cash flow and allowing you to adapt the unit to your specific business needs.

The R7 provides an automatic and highly secure system, maximizing the recycling of your cash and your retail space. Automated processes reduce cash handling costs and prevent the risk of fraud and robbery, resulting in a quick return on your investment. This system eliminates miscounts, paperwork and cash shortages, and can be used with online management software, giving you access to real-time information and allowing for end-to-end remote monitoring.

The main advantage of the R7 is its flexibility in terms of its note recycling functionality, smaller footprint and multiple uses across your business.

Businesses have used the robust, durable note recycler for point-of sale (POS) transactions, off-site reconciliation and their payroll needs. The recycler is ideal for cash-intensive businesses, such as Cannabis, Cafes, Gaming, Liquor Stores, Parking Garages and Vending Machine Operators, among others.
