## Product Showcase - Chute Closure Device

Chute Closure  
Open Position

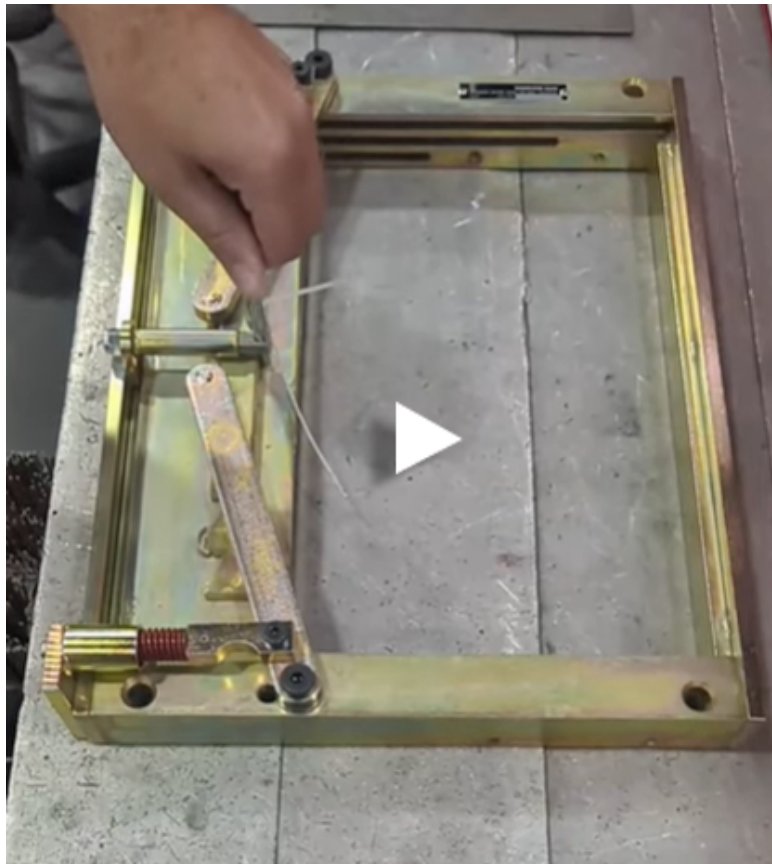

Chute Closure  
Closed Position

In response to the ever-evolving tactics of criminals, Hamilton offers a solution to address the rising trend of Hook and Chain robberies targeting ATMs and Night Heads. Our Chute Closure Device serves as a secondary defense against physical attack on after hour depositories.

Should an attempt to forcibly remove the night head from its place, the Chute Closure Device activates sealing off the chest's opening. This proactive measure effectively stops criminals, preventing unauthorized access and safeguarding valuable deposits.

- Retrofittable to existing Hamilton and competitor heads.
- Retrofit mounting plates and shield plates available.
- Competitor option is only designed to work with their depository.
- UL Rated secondary protection.
- Robust construction 2" x 2" machined frame w/ 1/4" thick plates.
- Competitor uses 1/8" thick steel.
- Optional electric version that fires when an alarm is triggered.
  - Ties directly into alarm panel
  - Closure can be set up to activate if the bucket is open for too long.
  - Attack to head will activate closure device prior to being pulled from wall.
  - Closure can be remotely activated.
  - Option to set up to out of service light to avoid deposits when an AHD has been attacked.

See the Chute Closure in action in the below video.

# Updates to the Channel Partner Portal

Visit the Hamilton Channel Partner Portal. We understand that being able to provide updated sales, marketing, and support information at any time of the day is a must. Below you will see just some of the newest items that have been added to the Channel Partner Portal.

## Portal Benefits and Features

- PDF & CAD Drawing Files
- Marketing Materials
- Company News
- Upcoming Events
- Webinar Videos
- Product Presentations
- Tech Support Call Request
- Hands on Tech Support Videos
- Updated Equipment Pricing
- Parts Pricing

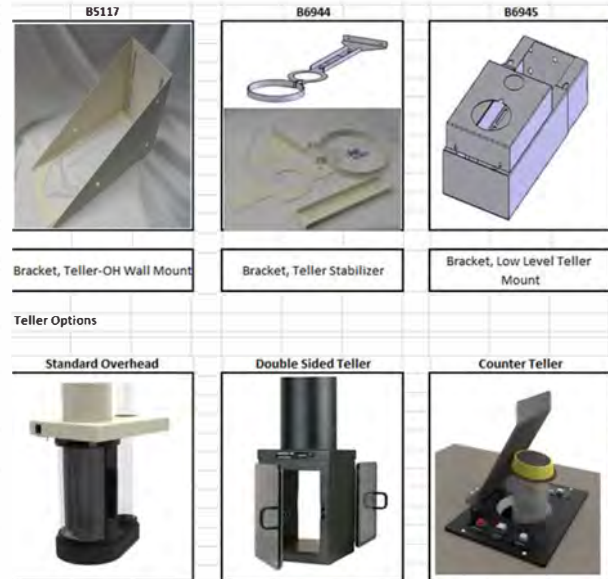

One of the spotlights has been the addition of the new audio operations video. The below video promotes proper operation and adjustment on Hamilton audio consoles and wireless headsets. Many other videos can be found on the channel partner portal that can help your sales and service teams.

Additionally, we have recently rebuilt the Drive-Up price guide. The new price guide simplifies previous versions of the price book and gives a better user experience.

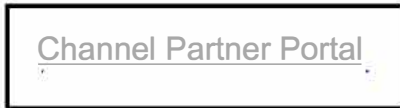

Overhead Systems		Underground Systems	
System Number	Description	System Number	Description

We welcome you to come and experience the continuous evolution of the Hamilton Channel Partner Portal. If you haven't joined us yet, take the first step of visiting our website and requesting access today.

# A New Member of the Gunnebo Family

Hamilton would like to welcome a new member to our Gunnebo Family. This past October Gunnebo acquired Tecnosicurezza Locks & Security Systems.

"The locks market is moving fast towards connectivity, and Tecnosicurezza together with Gunnebo Safe Storage will form a strong base on which to build our next-generation locks and Safe Storage Solutions." says Stefan Syrén, Gunnebo Group President & CEO.

The addition of Tecnosicurezza is just our start into future of connectivity. Hamilton with support of GSS is moving forward with engineering and technology to meet customers evolving needs.

Some Channel Partners are already using Tecnosicurezza products. To learn more about Tecnosicurezza locks, please reach out to your Hamilton Regional Sales Director.
