

Cash Management Solutions for the Retail Industry

Increase operational efficiency and reduce costs

Cash deposit, cash recycling and remote tracking/reporting

GUNNEBO®

Cash Management Solutions

Increase your efficiency while limiting risks of theft and robbery

With cash being one of the most popular forms of payment today, cash handling is a critical part of managing a retail operation.

For many retailers, cash offers advantages such as no fees and direct revenue. But despite these advantages, cash also leaves owners exposed to a whole new set of business risks – for their operations, employees and customers.

Security risks. Large amounts of cash on premise leave retail owners vulnerable to employee theft and “smash and grab” robberies, putting employees and customers in harm’s way.

Lost time. Counting, recounting and reconciling cash takes time away from sales and customer service activities.

Shrinkage. Employee theft, shoplifting, human error and vendor fraud all contribute to discrepancies between book and physical inventories, causing a loss of profits and an increase of company costs in other areas.

Gunnebo Cash Management Solutions

Gunnebo brings a family of cash management solutions to the retail industry to enhance security, improve operational efficiency and reduce losses from theft and fraud.

Gunnebo’s solutions provide automated closed cash handling, cash deposit, cash recycling and remote tracking/reporting functionalities. The systems deliver fast, efficient and secure cash processing, safe storage and online access to cash data, analytics, and reporting, ensuring your cash is not only properly managed and protected, but your staff and customers are too.

The closed cash handling, smart safe, cash recycler and remote online management solutions can be integrated across single or multiple store locations to increase cash visibility and improve operations.

By improving security, accountability and efficiency across your retail operations, Gunnebo cash management solutions ensure your employees, customers and profits are kept safe and secure.

SafePay Complete

Closed cash handling systems in front and back offices and combines recycling.

- Counter-integrated, self-service unit with multiple configurations
- Multiple currencies, enhanced note insertion and optional ink protection
- Notes are instantly registered, counted and deposited for secure storage
- Storage capacity up to 800 notes and 3,000 mixed denominations
- UL-graded back-office deposit unit for overnight storage

SecureCash Pro S

Front-office, under-counter note deposit system.

- Plug-and-play system enables operation after quick installation
- Single note deposit using a cassette-based system
- Notes are instantly registered, counted and deposited for secure safe storage
- Deposits up to 2.5 notes per second
- Storage capacity up to 1,200 notes (600 notes optional)

SecureCash Deluxe/Deluxe Plus

Compact and secure cash deposit systems for under-counter areas.

- One or two note acceptors with Deluxe or Deluxe Plus models
- Accepts up to a bundle of 30 notes
- Notes are instantly registered, counted and deposited for secure storage
- Storage capacity between 1,200 and 4,400 notes
- Tube dispenser, sidecar and pedestal available

SafeRecycling R7/RS7

Full service cash recycler for combined cash deposit and dispensing.

- R7 note model counts 10 notes per second with continuous deposit
- Manual deposit function with envelope slot
- 10" touch screen shows real-time visibility of cash balances and service detail
- Capacity of up to 16,400 notes depending on cassette configuration
- Multi-factor authentication - ID, proximity and fingerprint
- RS7 model includes coin recycler sidecar

CashControl Online Management Tool

Online management tool to monitor and track your cash in the store.

- Views of daily cash volumes, deposits, withdrawals and sales reconciliation
- View report trends and summaries from one or several retail locations
- Identify and investigate suspect activity with transaction and analytic reports
- Multi-device design – access data from desktop, tablet or mobile device

Cash Management Solutions

Improve security, accountability and efficiency across your business

Benefits

Cash Deposit

- Improve security with less exposed cash
- Increase staff productivity and reduce costs with faster, accurate counting
- Reduce shrinkage with automated deposits
- Spend less time reconciling cash at end of day
- Integrated with Gunnebo's Tube Dispenser means less change orders, enabling staff to spend more time engaging customers

Cash Recycling

- Improve security and operational efficiencies
- Increase cash visibility at the store level
- Track/record all cash transactions, including note's serial numbers
- Reduce operating cash levels at each location

Remote Tracking/Reporting

- Optimize cash flow planning and free up cash faster to grow your business
- Prevent loss by identifying internal theft
- Increase staff productivity and customer satisfaction by simplifying cash operations
- Rest easy knowing all backup and restore routines are included

Technical Support

With CashControl, you'll receive real-time status information for fast troubleshooting, enabling you to solve 80 percent of issues remotely and minimize downtimes.

Gunnebo Cash Management solutions are sold and serviced in the U.S. through a network of authorized channel partners nationwide.
