# Gunnebo CashControl

## Integrated online management tool for cash management

CashControl is an integrated online management tool that synchronizes all Cash Management units and provides real-time information of entire cash operations. The web-based application also connects to cash-in-transit (CIT) systems to optimize pick-up and delivery routines.

All cash operations across multiple store locations can be monitored and tracked so they can be optimized and secured, from start of day to the end of day, in the front and back office, and during inventory changes within the safe.

CashControl helps reduce the time spent on cash level monitoring and end-of-day reconciliation, providing automated tools and routines to guide your staff at the stores.

**GUNNEBO**®

# Gunnebo CashControl

CashControl provides a comprehensive view of all the cash management solutions deployed in the retail store network. With a single view, the store manager or finance department can get a full overview of cash operations in all stores. Its multidevice design gives you complete flexibility to access store operations data from your desktop, tablet or mobile device.

## Start of day

- Automated refilling routines
- Optimization of float levels by denominations
- Automated change safe inventory

## During the day

- Cash-level monitoring
- Real-time operational status
- Express refilling

## End of day

- Sales reconciliation
- Change safe revision

CashControl can be integrated with Retail and CIT systems, providing a seamless operational integration with external third-party systems, with CIT route planning, Retail finance and ERP systems, or Banks who can provide pre-crediting services.

## CashControl Cloud Hosting

Gunnebo provides a cloud environment to host CashControl with full service level agreement. This option provides you with complete peace of mind about system availability and on-site IT management of the software.

### Benefits

**Corporate managers:** Optimize cash flow planning across all retail locations with a comprehensive view of cash amounts, sales reconciliation and CIT pickups/ deliveries.

**Store managers:** Increase staff productivity and customer satisfaction by automating and simplifying cash operations and spending more time with customers.

**IT managers:** Increase uptime with Gunnebo Cloud Hosting platform and minimize database maintenance work. All backup and restore routines are included for total peace of mind.

**CIT companies:** Optimize pick-up and delivery routes by receiving real-time cash level and forecasting information from the stores.

**Technical support:** Receive real-time status information for fast troubleshooting. Solve 80 percent of the issues remotely and provide proactive maintenance to minimize downtimes.
