

Gunnebo SecureCash Pro S

Make your store a safer place to work

Fear of robbery at work is a very common feeling for staff members in retail environments. Keeping cash locked away and out of sight greatly reduces the temptation for robbery and offers staff greater peace of mind.

But for many small retail businesses, cash handling systems can be costly and too complicated for their specific cash management needs. They need a simple, efficient and convenient solution that reduces the risk of robbery, requires less investment and ensures the exact amount of cash is accounted for at every cash drawer and at every store location.

Smart deposit and secure cash processing

SecureCash Pro S is perfectly designed for small retail outlets. Adapted to under-counter installation, it provides an ergonomic, frontline cash handling solution to manage banknote depositing and processing efficiently and securely.

Notes are automatically registered, counted and deposited, minimizing the risks of robbery, burglary and internal theft. SecureCash Pro S captures note validation and note value data in real time at the point of sale. Cash deposits are untouched until they reach cash processors, ensuring 100% of your money finds its way to your bank account.

GUNNEBO®

Gunnebo SecureCash Pro S

Deposit and secure cash

SecureCash Pro S is a single note deposit solution using a cassette-based intelligent system. Take advantage of the unit's plug-and-play system that enables operation after quick installation and is always ready to receive cash. Notes presented are accepted, instantly counted and stored in a B-rated safe.

Log in to the device with a user ID and password to start the transaction. Once a transaction is started, multiple single notes are automatically registered, counted, deposited and stored in a cassette for quick and easy collection. For convenient cash-in-transit (CIT) pick-up, the notes are sent straight into a cassette.

No more manual counting or verification. You can save the obvious costs associated with robbery while your staff is benefiting from a safer work environment. They can spend less time on cash administration and more time on customer service.

Track cash flow in real-time with CashControl

Continuously monitor real-time cash levels using Gunnebo's CashControl web-based monitoring system to ensure transaction transparency, reports or data export.

With CashControl, end-of-day accounting is performed automatically without the need for employees to manually count cash. Retailers can even monitor the amount of cash collected by CIT across a chain of stores.

CashControl's reporting tools help optimize performance and ensure in-store security routines are being followed.

CashControl can either optionally be hosted by Gunnebo or by the retailer, who may choose to run the program locally or centrally.

Steel housing	1/8" steel casing 1/4" steel door
Operating system	Real-time operating system
Feeder capacity	Single note deposit
Deposit speed	Up to 2.5 notes/second
Cassette capacity	1,200 notes
Communication	TCP/IP (with option to add Cellular modem)
Dimensions (WxDxH)	7" x 16" x 23.5" (includes 1.5" pedestal base)
Weight	76 lbs.
Power supply	90 - 264 VAC input
Power consumption	4 amps at 115 VAC/2.2 amps at 230 VAC
Operating condition	25' - + 70' C standard

Benefits

- User interaction via a touchscreen GUI
- Enhanced security and peace of mind
- Faster return on investment
- Unrivaled protection against fraudulent notes
- Increased efficiency and higher acceptance rates due to advanced recognition algorithms that confirm notes as genuine
- Time and cost savings as a result of a simplified cash handling process, and reduced maintenance and downtime
- Less back-office administration due to easy-to-use configuration and simple installation
- Complete transaction transparency for zero cash discrepancies
- Real-time, web-based monitoring of cash levels via CashControl software
- Ability to approve CIT companies for cash collections
- Overnight closure
- 4" pedestal base optional
- Options: Sidecar Storage Vault and TubeVend available
