## HA-1000 Hamilton's legendary 4 1/2" Drive-Up system

**Hamilton Air's HA-1000 is engineered to deliver long-term reliability**

The HA-1000's superior quality, affordability and flexibility set the industry standard for 4 1/2" pneumatic drive-up systems.

**Easy to Maintain** with a corrosion-resistant stainless steel and polymer coated finish.

**Low cost of Ownership** since it's been at the top of the industry for reliability.

**Simple Installation** with no blower packs to be installed in the canopy or remote location. Hamilton's patented PowerStar Air Turbine is located in each unit.

**Superior A/V Communication System**

**Options:**

- Available in upsend and downsend
- Adaptable to replace old 4" units without replacing the tubing
- Extra deep downsend customer units are also available for replacement of old systems
- Several Operator/Teller Unit options allow you to create a system that fits your needs
